Quality Control :-

Since product quality is our top priority we work with high-quality latex, advanced technologies and standards and state-of-the-art equipment manufactured according to international standards, insuring the highest product quality. It also goes through 100% electronic testing to detect pinholes and monitored to ensure consistency and safety, which is our assurance of reliability.

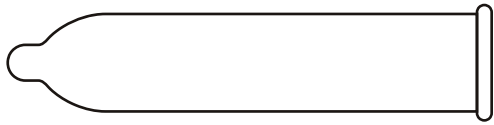

During the production process, 100% of condoms are electronically tested and internal quality control tests are performed in our Lab which contain world class testing equipment's such as pin holes, tensile, air burst, electrolyte water, water leakage, package integrity and even aging test where accelerated temperature is applied to simulate the effect of time on the condom.

Condom Specifications
